I completed my last topic and quiz tonight for Software Security. I want to thank you for a great course. I fought to install the VM tools sometimes but somehow with help on discussion forums and swapping computers in one case I was able to do all the projects successfully. I am unemployed at this time and do not know what direction my future will take, but I feel I learned things that were valuable to know regardless. Also, in addition to the lecture videos, assignments and quizzes, the discussion forum in this class and help from class mates were what allowed me to get through some parts of the class successfully - their help was more valuable in this class than in some of the other online classes I've taken. Everyone was very helpful so thanks to them too. One person described me as a maniacal sleuth in my dedication to getting through the challenges I was having getting the tools installed and all projects done successfully, and I appreciated it. Best wishes to you all in the future! ;-)

Hi Karen, you maniacal sleuth.. haha :) Good to hear you got through it all in the end, embattled with configuration/setup adversity as you were.

Apologies for not getting back to you last weekend like I'd hoped to, time got the better of me, still has.. only now am I beginning the

thank you!

third Project, not sure if I'll have time to make any progress with it though. If I do well on Week 6's quiz, as I have done on the others (Week 5 excepted), I still might just scrape > 85%. Regardless, there's still much to continue learning from. I echo your sentiments about the helpfulness of other class members here, so many wonderful posts that have helped me to clarify various points.

When my schedule's a bit more forgiving I'll try and get back to you with some of the points I had in mind.. maybe by start of next week. In the meantime, I stagger on, in my own sleuthy maniacal way.

A good weekend to you. You can start on the Crypto course now! :/ :)

I might consider it if offered in 2015, but from now until Jan. 2015, I'm trying to find a job! If I'm at home in Jan. 2015, I will likely explore even more online courses. I know people work and have families and take online courses, but I probably can handle at most one while working with family time. Nice to hear from you! Project 3 and Week 6's Quiz is easy in comparison to the earlier weeks, at least I thought so. I did not even have to post one question to the forum for project 3! Good luck finishing up and thanks for following up! ;-)
