Hi,

I just received your notice that the certificates were ready for Software Security. However, when I clicked on the link, I did not find the "download" button to download the certificate as I did for the other Coursera courses I took. Is that the way it is supposed to be for this class? I never take my online classes on the "signature" track so it was just the regular track. If there won't be a download button unless you are on the signature track, it does not matter, since I really take these courses to learn, whether or not I receive a certificate, and I did see my grade listed there (just no download button). Thanks once again for a great class and happy holidays to all! ;-)

Same issue here. There is no option to download 'Statement of Accomplishment'. This was available for regular track students in other courses that I have taken before.

From course description:

*This course only offers a **Verified Certificate**. It will not offer the Statement of Accomplishment. ...*

If you complete the course without verifying your work, you will still earn a completion grade on your Course Records page.

So no button. Just score on your Course Records page.

Thanks - did not notice that comment on the course description! ;-)

So there is no button issue with the downloading of the statement of accomplishment.
I take the courses to learn and the statements of accomplishment are just a bonus if you get one!
But thanks for letting me know since I did not read the fine print! ;-)
