Grading and Logistics

Grading and Logistics:

Here is how the**final grade** for the course will be calculated:

1. **Weekly quizzes** (Weighting: 60%). Each quiz will consist of 10-20 questions, and you will have 7 days to submit it.
2. **Bi-weekly labs** (Weighting: 40%). Every two weeks, you will be asked to carry out a hands-on lab assignment. Upon completing the assignment on your own, you will be asked to answer specific questions about it, as a quiz. The quiz will be due two weeks after the assignment is made available.

All graded materials are submitted through the course website and will be graded electronically by the course software.

- For weekly quizzes, you will allowed three attempts, but you will not learn anything other than your total score until after the deadline.
- For quizzes assessing your execution of the labs, you will be given up to ten attempts, and you will learn which questions you got wrong.
- To maximize your learning, for the in-video quizzes you will be allowed up to three chances at submitting the right answer. In-video quizzes will not count towards your course grade.
- No late submissions are allowed.

Grading Policy

This course only offers a **Verified Certificate**. It will not offer the Statement of Accomplishment. You can start verifying your work for free and pay anytime before the final week of the course. Coursera Financial Aid is also available for learners with limited economic means.

If you complete the course without verifying your work, you will still earn a completion grade on your Course Records page. For more information, see our announcement titled "Verified Certificate Policy For This Course" or read more about Coursera Accomplishments in the Learner Help Center.
